

Table 1. DRAFT blank template; no measurements. Planned supervision comparison between keyframes only and additional in-between RGB frames. Each dataset uses paired runs under the same code and budget, which remain unassigned here. Separate code or budget regimes must be reported as separate panels; no historical replay measurements have been inserted.

Dataset	Code / budget	Supervision	PSNR $\uparrow$	SSIM $\uparrow$	LPIPS $\downarrow$	#G (k)
RPNG	—	Keyframes only	—	—	—	—
	—	+ in-between frames	—	—	—	—
UTMM	—	Keyframes only	—	—	—	—
	—	+ in-between frames	—	—	—	—
Aria	—	Keyframes only	—	—	—	—
	—	+ in-between frames	—	—	—	—

— = unmeasured or an unassigned condition. Causal trace, poses, initialization, RGB loss, topology, sampler, and absolute render budget must be fixed for each pair; any quota or learning-rate-position mismatch must be disclosed.
